Future-proof

To help you stay ahead of changes soon to be imposed in Europe, we have developed a new line of microplastic-free solutions. The first ones, two film coats for sunflower, are now available. The products in our new range of microplastic-free film coats are effective, sustainable and comply with current and upcoming regulations, while delivering all the quality your seeds deserve.

Why compromise on quality?

The seed industry has a part to play in reducing the environmental impact of agriculture. The challenge is in finding sustainable solutions without compromising on quality. Incotec's new microplastic-free film coats live up to that challenge. Application is easy, flowability is excellent, dust-off is minimal and equipment is easily cleaned. The result? An efficient and trouble-free production process.

Flowability

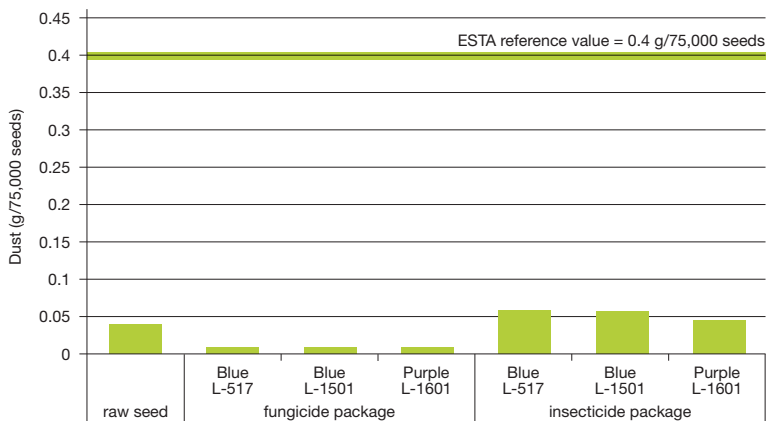

Benefits

Incotec's new Disco film coats for sunflower (Blue L-1501 and Purple L-1601) are developed according to the current ECHA guidelines to comply with upcoming regulations and restrictions with regards to microplastics. But there's more: not only do the film coats meet all quality requirements, they score best-in-class for flowability and exceed the quality standards for dust control. With these attractive and easy-to-use film coats, you treat your seeds to a top-quality product - sustainable and compliant for years to come.

Dust-off (4 weeks after coating)

Disco L-1501 and Disco L-1601 are the first of Incotec's new range of microplastic-free film coats: one is blue, the other is purple, both are optimized for top performance on sunflower seeds.

- Microplastic free
- Minimal dust-off
- Excellent flow properties
- Compatible with PPPs
- High-quality appearance; attractive light blue or purple
- Easy-to-clean equipment

MISSION ZERO

SUSTAINABLE TO THE MAX
