

DISCO PLUS Clear L-3803 Film coat for Wheat seed

- **High compatibility:**
With a wide range of agrochemicals
- **Faster plant establishment:**
Improved shoot length and biomass lead to quick above-ground growth, establishing a strong canopy early in the season
- **Higher yield potential:**
Strong germination and rapid growth result in better plant vigour, supporting higher yields and consistent production
- **Support earlier harvests:**
Faster growth leads to quicker crop development, enabling earlier harvests

Untreated wheat seeds

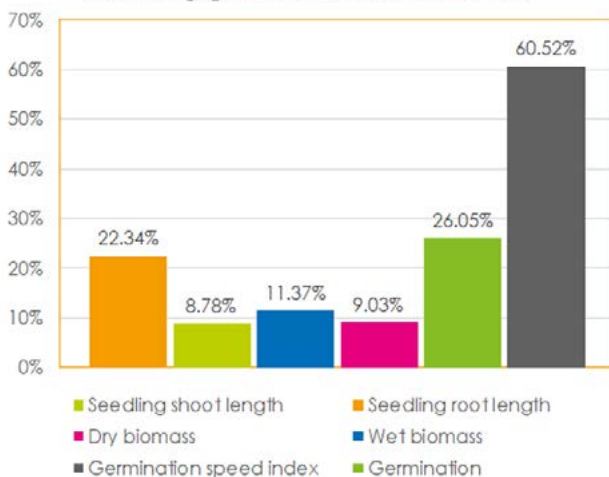

Wheat seeds treated with GeniusCoat

Wheat seeds treated with Disco Plus Clear L-3803

Seedling growth valuation L-3803

Wheat seedling growth valuation of wheat seed treated with Disco Plus Clear L-3803 compared to wheat seed treated with conventional film coating.
15 plants x 3 reps = total 45 plants / trial
Results are averages of two trials

Seedling root length %: growth of root system

Seedling shoot length %: strong shoots lead to healthier, more productive plants

Wet biomass %: indication of good growth condition

Dry biomass %: more usable plant material

Germination %: better crop establishment

Germination speed index %: faster crop establishment
