

INCOTEC TECHNOLOGIES INDIA FILM COATS

THE BEST WAY TO PROTECT YOUR SEEDS

Seeds need protection and nourishment and the various products that provide this must be applied safely and effectively. Film coating is a good way of doing this. Our film coats have excellent adhesion properties and keep the plant protection products, biologicals and stimulants all within the thin film coat layer. We have many different film coat formulations, each one tailored to meet the unique and specific needs of the crop it is designed for.

the seed enhancement company

Part of Croda International Plc

INCOTEC TECHNOLOGIES INDIA FILM COATS

Benefits of Incotec's Disco products:

- Plant protection products can be applied directly onto the seeds providing precise and efficient protection
- Excellent retention of the active for maximum protection
- Reduced dust emissions, providing a safer working environment for operators and growers
- Improved flowability making sowing and processing faster and more efficient
- Better appearance to underline seed quality
- Improved abrasion resistance to prevent the coating rubbing off
- Heightened visibility on the soil when coloured making it easy to monitor the results of sowing
- Formulations tailored for specific seed species
