

INCOTEC TECHNOLOGIES SOUTH EAST ASIA FILM COATS

THE BEST WAY TO PROTECT YOUR SEEDS

Seeds need protection and nourishment and the various products that provide this must be applied safely and effectively. Film coating is a good way of doing this. Our film coats have excellent adhesion properties and keep the plant protection products, biologicals and stimulants all within the thin film coat layer. We have many different film coat formulations, each one tailored to meet the unique and specific needs of the crop it is designed for.

incotec

the seed enhancement company

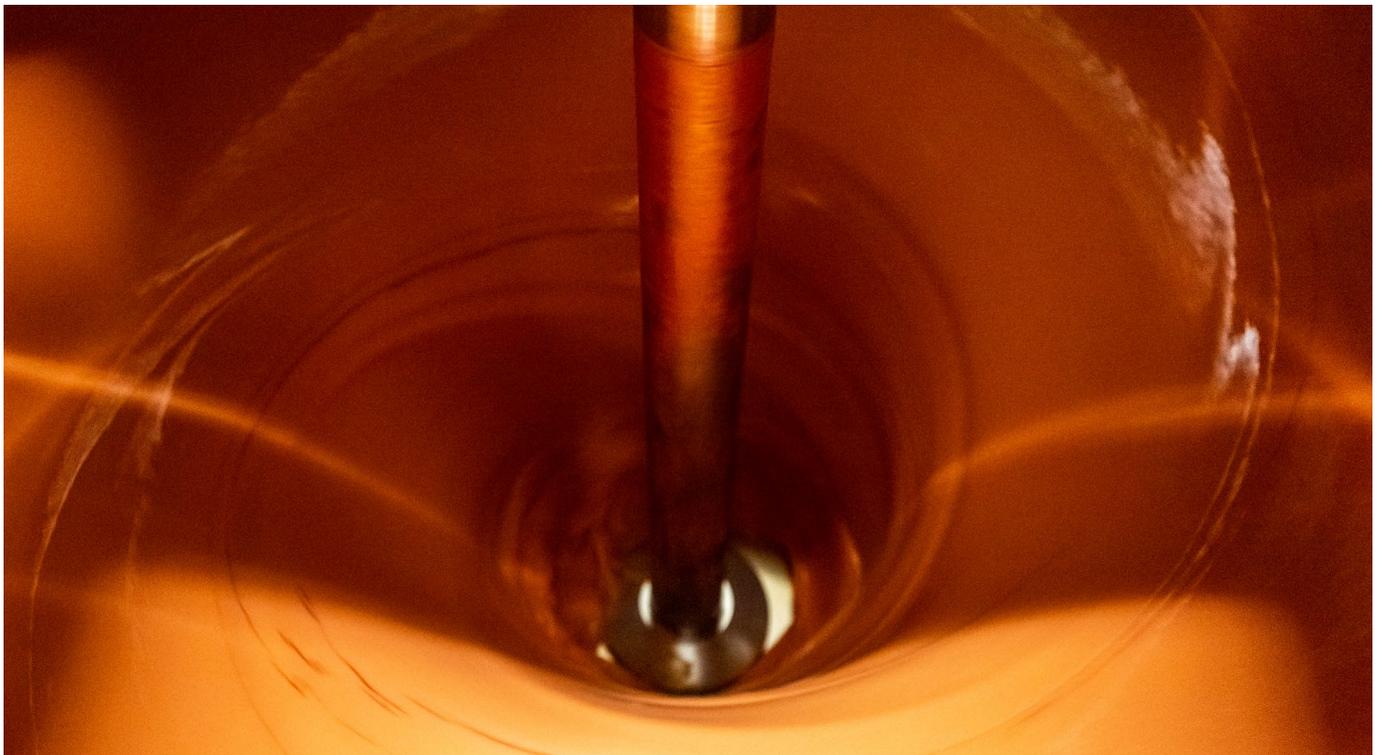

Part of Croda International Plc

INCOTEC TECHNOLOGIES SOUTH EAST ASIA FILM COATS

Benefits of Incotec's Disco products:

- Plant protection products can be applied directly onto the seeds providing precise and efficient protection
- Excellent retention of the active for maximum protection
- Reduced dust emissions, providing a safer working environment for operators and growers
- Improved flowability making sowing and processing faster and more efficient
- Better appearance to underline seed quality
- Improved abrasion resistance to prevent the coating rubbing off
- Heightened visibility on the soil when coloured making it easy to monitor the results of sowing
- Formulations tailored for specific seed species

INCOTEC TECHNOLOGIES SOUTH EAST ASIA

FILM COATS

CROP	Product	Colour	Characteristics
CORN	L-074	Blue	A blue film coat liquid, designed to film coat all types of vegetables seed and is also suitable for application on pellets
CORN	L-075	Orange	An orange film coat liquid, designed to film coat all types of vegetables seed and is also suitable for application on pellets
CORN	L-149	Red	An intense red coloured, cost-effective base formulation for use on field crops
CORN	L-200	Red	Very strong binding properties
CORN	L-244	Clear	A colourless film coat, delivering high dust-off control in a cost effective way
CORN	L-292	Red	Disco AG Red L-292 is a strong luster-red coloured liquid with strong binding properties, making it suitable for use in combination with higher dosages of plant production products
CORN	L-321	Red	Designed to offer good "edge" covering
CORN	L-553	Green	This high performance green film coat liquid delivers a high quality appearance through a strong and complete covering
CORN	L-902	Blue	A blue film coat liquid, tailored for corn, highly safe to corn seed, with a nice cosmetic appearance, excellent dust-off control and flowability.
CORN	L-907	Purple	Very good abrasion resistance
CORN	L-1111	Red	Cost effective formulation with shine effect, mainly used on Cotton, Sorghum and Pearl millet
CORN	L-1510	Blue	An upgraded blue film coat liquid for corn based on L-902 that excels on maximizing abrasion resistance while maintaining the nice cosmetic appearance and safety feature of L-902
CORN	L-7401	Green	A green film coat formulation for use on low value OP crops whether vegetables or field crops
OPEN POLLINATED CROPS	L-143	Red	Improved cosmetic appearance, improved retention of active ingredient, cost effective treatment
OPEN POLLINATED CROPS	L-144	Red	Attractive shiny appearance, improved retention of active ingredient, cost effective treatment
VEGETABLES	L-073	Red	A red film coat liquid, designed to film coat all types of vegetables seed and is also suitable for application on pellets
VEGETABLES	L-076	Green	A green film coat liquid, designed to film coat all types of vegetables seed and is also suitable for application on pellets
