

# RAXIL<sup>®</sup> COMPATIBLE

## FILM COAT FORMULATION FOR CORN

NEW

## DISCO<sup>®</sup> AG BLUE L-950

Incotec has developed a new blue film coat formulation for China that outperforms currently available products on:

- **Flowability & plantability**
  - Dust control
- **Dose rate (reduction of 25%)**
  - Abrasion resistance
  - Cosmetic properties

incotec

the seed enhancement company

Part of Croda International Plc

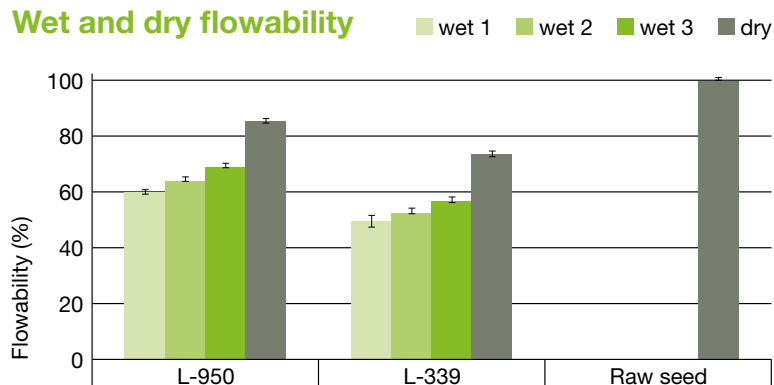

# DISCO® AG BLUE L-950

NEW

For the Chinese market Incotec developed L-950, a film coat that performs optimally with Raxil\*-based plant protection products. It has improved wet and dry flowability when compared to the current Incotec offering, L-339.

\*Raxil is a registered trademark of Bayer

## Wet and dry flowability

Results confirm that the L-950 has improved wet and dry flowability, providing faster and trouble-free transportation of the seeds throughout the entire process: in the facility and in the field.

A treatment with L-950 results in attractive, turquoise-coloured seeds.
