

# OMEGAKOTE

## FILM COAT FOR SPINACH

### Sustainable protection from soil-based diseases

- Pythium Control
- Protects emerging root system
  - Organic seed treatment
  - Microplastic-free film coat

#### Sustainable protection

This high-performance green formulation provides a sustainable protection for early stages of Pythium even before the plant emerges. This protection establishes a barrier around the plant and the developing root which will help protect the crop against Pythium until the first true leaf. The microplastic-free seed film coating incorporates an ASCO (Agricultural Services Certified Organic) certified organic seed treatment that shields the plant's emerging root system.
